Lean for Leaders

In times of crisis, lean approaches gain in importance. This is because companies can reduce their costs comparatively quickly with lean measures and, in doing so, secure their liquidity.

Get to know the practical tools with which you can set up a cost reduction programme and develop sustainable cost reduction strategies. Those who succeed in streamlining their costs and processes now can still emerge as winners from the crisis.

Group of participants:
Managers and project leaders

Duration: **approx. 2 hours**

Language:  

Learning objectives

- ✓ You will learn effective tools and strategies to reduce costs.
- ✓ You will know how to identify and eliminate waste and bottlenecks.
- ✓ You will learn to plan tasks and projects more efficiently with the help of templates.
- ✓ You will learn to develop strategies for future-proofing your own area.

Contents

- Cost reduction in your area
- Individual roles and tasks in cost optimization
- What analyses and processes can support?
- How to make your team „leaner“
- How to ensure the success of your measures in the long term
